Pediatr Cardiol 16:313–316, 1995

Subject Index

Abbreviations: Case Report - CR; Letter to the Editor - LE; Obituary - O

Abortions, spontaneous, chromosomal defects among; 155
Absent pulmonary valve, in tetralogy of Fallot; 120
Adenosine, wide complex tachycardia after administration of (CR); 36
Adolescents, diastolic runoff with widened arterial pulse pressure in (CR); 145
with type I diabetes, echocardiographic indices of contractility in; 1
Adult women, effect of congenital heart disease on menstrual patterns in; 12
Age, at surgery and regression of right ventricular hypertrophy; 53
Airway obstruction, innominate artery enlargement in congenital arteriovenous fistula causing (CR); 287
Amiodarone, as short-term treatment for paroxysmal supraventricular tachycardia; 16
Amiodarone hydrochloride, ventricular fibrillation after treating atrial flutter with (CR); 82
Angiography, left innominate vein compression diagnosed by (CR); 291
right ventricular size and function assessed by; 209
Anomalous venous connection, modified Fontan procedure for (CR); 201
Aortic arch, double, biphasic flow velocity pattern in descending aorta in (CR); 87
interruption of, with aortic atresia and aortopulmonary fistulous tract (CR); 147
Aortic arch interruption, hypoplastic left heart syndrome with (CR); 304
Aortic atresia, with interruption of aortic arch and aortopulmonary fistulous tract (CR); 147
Aortic coarctation, ambulatory blood pressure monitoring after repair of; 166
left ventricular growth after repair of (CR); 176
Aortic—left ventricular tunnel, role of transesophageal echocardiography in managing (CR); 137
Aortic obstruction, associated with Ebstein's anomaly of mitral valve (CR); 45
Aortic stenosis, electrocardiography and echocardiography of; 261
Aortopulmonary fistulous tract, aortic atresia with interruption of aortic arch and (CR); 147
Arrhythmia, SAECGs used to determine after right ventriculotomy; 114
Arterial duct, hemolysis associated with umbrella occlusion of (LE); 101
Arterial switch, pulmonary hypertension complicating (CR); 297
Atrial flutter, ventricular fibrillation caused by amiodarone hydrochloride treatment of (CR); 82
Atrial isomerism, modified Fontan procedure for (CR); 201
Atrioventricular block, after blunt chest trauma (CR); 127
Atrioventricular septal defect, in infant with Noonan syndrome (CR); 95
type A postaxial polydactyly and (CR); 242
Balloon angioplasty, complications of (CR); 85; (LE) 207
Balloon occlusion, of coronary artery fistulas using (CR); 38
Behçet's disease, with right atrial vegetation (CR); 150
Berry syndrome, diagnosed by Doppler echocardiography (CR); 42
Blood pressure, ambulatory monitoring of, after coarctation repair; 166
Blood pressure cuffs, effect on neonatal circulation; 20
Blunt chest trauma, ruptured interventricular septum after (CR); 127
Brachiocephalic artery anomaly, left innominate vein compression by (CR); 291
Cardiac catheterization, intussusception of catheter sheath during (CR); 85; (LE) 207
Cardiac dysrhythmia, in children with cardiomyopathy; 56
Cardiomyopathy, cardiac dysrhythmia in children with; 56
dilated, afterload reduction for (LE); 51
dilated, effect of immunosuppressive therapy in children with; 61
dilated, role of carnitine deficiency from renal tubular wasting in (CR); 76
hypertrophic, color Doppler echocardiography of (LE); 153
hypertrophic, in infant with Noonan syndrome (CR); 95
Carnitine deficiency, from renal tubular wasting, cardiomyopathy caused by (CR); 76
Catheter sheath, intussusception of (CR); 85; (LE) 207
Cerebral arteriovenous malformation, central blood flow dynamics of infant with (CR); 141
Chest pain, in children, etiology of; 69
Children, etiology of chest pain in; 69
intravenous amiodarone treatment for paroxysmal supraventricular tachycardia in; 16
late potentials on SAECGs in; 114
with cardiomyopathy, cardiac dysrhythmias in; 56

with congenital heart disease, risk of pulmonary tuberculosis in; 172
with pressure- or volume-loaded ventricles, electrocardiographic data for; 261
with type I diabetes, echocardiographic indices of contractility in; 1
Chondrodysplasia punctata, heart lesions and (CR); 247
Chordal rupture, of tricuspid valve, neonatal tricuspid regurgitation caused by (CR); 133
Choriocarcinoma, diastolic runoff with arterial pulse pressure in adolescents with (CR); 145
Chromosomal abnormalities, role in congenital heart disease; 155
Congenital arteriovenous fistula, complicated by ductus arteriosus aneurysm (CR); 235
innominate artery enlargement in (CR); 287
Congenital heart defect, magnetocardiographic localization of ventricular pre-excitation (CR); 33
Congenital heart disease, effect of technical development on (LE); 100
incidence of; 155
menstrual patterns in women with; 12
postnatal, incidence and diagnosis of; 103
risk of pulmonary tuberculosis in children with; 172
tachycardia after adenosine administration to patient with (CR); 36
Congenital valvar aortic stenosis, with abnormal origin of right coronary artery (CR); 73
Coronary artery fistulas, percutaneous transcatheter occlusion of (CR); 38
Coronary artery to pulmonary artery fistula, as blood supply in pulmonary atresia and ventricular septal defect (CR); 90
Coronary bypass, oxygen desaturation after (CR); 197
Cytochrome c oxidase deficiency, in adolescent with mitochondrial cardiomyopathy (CR); 28
Diastolic function, in infants of mothers with gestational diabetes; 24
Doppler echocardiography, cardiovascular effects of growth hormone treatment studied by; 223
diagnosis of Berry syndrome by (CR); 42
of scimitar syndrome (CR); 283
right intraventricular ghost obstruction seen in (LE); 153
ventricular septal defect and pulmonary hypertension differentiated by; 6
Double drainage, total anomalous pulmonary venous connection with (CR); 301
Ductus arteriosus, histopathology of, after PGE_1 treatment (LE); 101
Ductus arteriosus aneurysm, congenital arteriovenous fistula complicated by (CR); 235
Ebstein's anomaly, of mitral valve, aortic obstruction in (CR); 45
Echocardiography, electrocardiographic data on volume-loaded ventricles compared with; 261
epicardial, coronary sinus unroofing detected and managed with (CR); 197
left ventricular thrombosis diagnosed by (CR); 182
load-independent indices of ventricular function determined by; 1
right ventricular size and function assessed by; 209
signal-averaged, late potentials after right ventriculotomy shown by; 114
transesophageal, role in managing aortic—left ventricular tunnel (CR); 137
two-dimensional, congenital heart disease diagnosed as TAPVC by (CR); 301
two-dimensional, of acquired pulmonary stenosis (CR); 179
two-dimensional, of scimitar syndrome (CR); 283
ventricular septal defect after blunt chest trauma diagnosed by (CR); 127
Electrocardiography, of left ventricular hypertrophy; 261
Endocarditis, Behçet's disease with right atrial vegetation mimicking (CR); 150
Endomyocardial biopsy, favorable effects of immunosuppressive therapy diagnosed by; 61
Exercise, cardiac performance during, after tetralogy of Fallot repair, 120
Familial symptomatic sinus bradycardia, autosomal dominant inheritance of (CR); 231
Fetus, with cerebral arteriovenous malformation, blood flow patterns in (CR); 141
Fontan procedure, factors associated with stroke following; 270
modified, for left atrial isomerism (CR); 201
Gestational diabetes, altered diastolic function in infants of mothers with; 24
Growth hormone therapy, cardiovascular effects of; 223
Heart disease, in infants, three studies of; 216
Heart transplantation, in infant with rhabdomyoma (CR); 204
Hemangiopericytoma, with hemopericardium during infancy (CR); 48
Hemolysis, after transcatheter occlusion of patent ductus arteriosus, surgical ligation of (CR); 194
Hypoplastic left heart syndrome, interruption of aortic arch and (CR); 304
left ventricular growth in (CR); 176
with male pseudohermaphroditism and bicornuate uterus bicollis (CR); 239

Hypothermia, postoperative junctional ectopic tachycardia treated by (CR); 294
Immunosuppressive therapy, dilated cardiomyopathy and active myocarditis and; 61
Infants, altered diastolic function in; 24
heart transplantation for rhabdomyoma (CR); 204
hemangiopericytoma with hemopericardium in (CR); 48
left ventricular thrombosis secondary to abnormal hemodynamics in (CR); 182
magnesium treatment of acquired torsade de pointes in (CR); 79
outcome of pulmonary atresia and ventricular septal defect on; 276
ventricular fibrillation after amiodarone treatment in (CR); 82
with Noonan syndrome and congenital heart defects (CR); 95
Innominate artery enlargement, in congenital arteriovenous fistula with tracheal compression (CR); 287
Innominate vein compression, by brachiocephalic artery anomaly (CR); 291
Kawasaki disease, thrombolytic therapy of, using plasminogen activator (CR); 186
Left ventricular contractility, effect of metabolic control and insulin on; 1
Left ventricular growth, in patient with aortic coarctation and hypoplastic left ventricle (CR); 176
Left ventricular hypertrophy, effect of growth hormone treatment on; 223
validity of electrocardiographic criteria for; 261
Left ventricular systolic and diastolic function, effect of growth hormone therapy on; 223
Left ventricular thrombosis, in infants, echocardiography of (CR); 182
Macrosomia, altered diastolic function of infants not related to; 24
Magnesium, acquired torsade de pointes in infant treated with (CR); 79
Magnetic resonance imaging, left innominate vein compression diagnosed by (CR); 291
Magnetocardiography, ventricular pre-excitation localized by (CR); 33
Male pseudohermaphroditism, hypoplastic left heart syndrome associated with (CR); 239
Menstrual patterns, effect of congenital heart disease on; 12
Mitochondrial cardiomyopathy, cytochrome c oxidase deficiency in adolescent with (CR); 28
Mitral regurgitation, neonatal myocardial infarction complicated by (CR); 131
Mitral valve, Ebstein's anomaly of (CR); 45
Monosomy X, association with congenital heart disease; 155
Myocardial infarction, neonatal, with late mitral regurgitation (CR); 131
Myocarditis, active, effect of immunosuppressive therapy in children with; 61
Neonates, comparison of studies of symptomatic heart disease in; 216
effect of blood pressure cuffs on circulation of; 20
myocardial infarction in (CR); 131
tricuspid regurgitation due to ruptured chordae tendineae in (CR); 133
with cerebral arteriovenous malformation, central blood flow patterns in (CR); 141
with congenital arteriovenous fistulas and ductus arteriosus aneurysm (CR); 235
Noonan syndrome, congenital heart defects in (CR); 95
Oxygen desaturation, after cardiopulmonary bypass (CR); 197
Paroxysmal supraventricular tachycardia, amiodarone for treatment of; 16
malignant wide complex tachycardia after adenosine administration for (CR); 36
Patent ductus arteriosus, hemolysis after transcatheter occlusion of (CR); 194
pulmonary valve and ventricular septal defect associated with (CR); 190
Percutaneous transcatheter occlusion, of coronary artery fistulas using detachable balloons (CR); 38
Pharmacologic autonomic blockade, bradycardia abolished by (CR); 231
Plasminogen activator, tissue-type, used as thrombolytic therapy in Kawasaki disease (CR); 186
Pneumonia, complicating hypothermia as treatment for tachycardia (CR); 294
Pregnancy, pulmonary hypertension and (CR); 31
Primary polydipsia, induced by verapamil treatment of supraventricular tachycardia (CR); 228
Procainamide, torsade de pointes acquired after treatment with (CR); 79
Pulmonary arterial stenoses, chondrodysplasia punctata and (CR); 247
Pulmonary atresia, coronary artery to pulmonary artery fistula as blood supply in (CR); 90
outcome of ventricular septal defect and; 276
Pulmonary blood supply, role in outcome of pulmonary atresia and ventricular septal defect in infants; 276
Pulmonary hypertension, arterial switch procedure complicated by (CR); 297
effect of blood pressure cuffs on circulation of newborn with; 20
pregnancy and (CR); 31
role of bidirectional shunting in; 6

Pulmonary stenosis, acquired, ultrasonographic diagnosis of (CR); 179
Pulmonary tuberculosis, incidence in children with congenital heart disease; 172
Pulmonary valve, and ventricular septal defect associated with patent ductus arteriosus (CR); 190
Pulse pressure, in adolescent with metastatic testicular choriocarcinoma (CR); 145
Rashkind umbrella, transcatheter occlusion of patent ductus arteriosus with (CR); 194
Renal tubular wasting, cardiomyopathy from carnitine deficiency from (CR); 76
Rhabdomyoma, heart transplantation in infant with (CR); 204
Right atrial vegetation, Behçet's disease presenting with (CR); 150
Right coronary artery, congenital valvar aortic stenosis with abnormal origin of (CR); 73
Right ventricle, echocardiography and angiography of size and function of; 209
Right ventricular ghost obstruction, seen in color Doppler echocardiography of hypertrophic cardiomyopathy (LE); 153
Right ventricular hypertrophy, surgical age and regression of; 53
Right ventriculotomy, late potentials on SAECGs in children after; 114
Scimitar syndrome, two-dimensional and Doppler echocardiography of (CR); 282
Stroke, after Fontan procedure, factors for; 270
Sudden cardiac death, cardiac dysrhythmias in children as predictor of; 56
Tachycardia, after adenosine administration (CR); 36
postoperative, fatal pneumonia after hypothermia for treatment of (CR); 294
supraventricular, primary polydipsia induced by verapamil treatment of (CR); 228
Teratoma, pulmonary stenosis caused by (CR); 179
Tetralogy of Fallot, cardiopulmonary performance during exercise after repair of; 120
regression of right ventricular hypertrophy and age at surgery for; 53
Thrombolytic therapy, tissue-type plasminogen activator used as (CR); 186
Torsade de pointes, acquired, treated with magnesium (CR); 79
Total anomalous pulmonary venous connection, with double drainage (CR); 301
Transesophageal echocardiography, role in managing aortic—left ventricular tunnel (CR); 137
Tricuspid insufficiency, after blunt chest trauma (CR); 127
Tricuspid valve, ruptured chordae tendineae mimicking mass on (CR); 133
Twins, Australian NHMRC registry of (LE); 100
Type A postaxial polydactyly, atrioventricular septal defect and (CR); 242
Type I diabetes, left ventricular contractility in children and adolescents with; 1
Uterus bicornis bicollis, in patient with hypoplastic left heart syndrome and male pseudohermaphroditism (CR); 239
Vagotonia, symptomatic sinus bradycardia caused by (CR); 231
Vasodilators, potential role of blood pressure cuffs for neonates receiving; 20
Ventricular fibrillation, during treatment of atrial flutter with amiodarone hydrochloride (CR); 82
Ventricular pre-excitation, magnetocardiographic localization of (CR); 33
Ventricular septal defect, and rudimentary pulmonary valve associated with patent ductus arteriosus (CR); 190
after blunt chest trauma (CR); 127
bidirectional shunt flow across; 6
coronary artery to pulmonary artery fistula as blood supply in (CR); 90
electrocardiography and echocardiography of; 261
outcome of pulmonary atresia and; 276
Verapamil, primary polydipsia induced by (CR); 228
Volume load, echocardiographic and angiographic identification of patients with and without; 209
Wolff–Parkinson–White syndrome, magnetocardiographic localization of ventricular preexcitation site in (CR); 33
